DRAFT — Repository Owner Rights Attestation

STATUS: DRAFT. NOT A GRANT OF RIGHTS.

>

This document is a declaration by the repository owner. It does not create a license from Rovio Entertainment Ltd. or any other rights holder. It is intended to accompany the signed rights-holder agreement in docs/PERMISSION_AGREEMENT_DRAFT.md. A public release still requires the signed agreement from the rights holder.

I, [LEGAL NAME], operating under the GitHub username rubiidev18alt, declare as follows:

1. I am the owner or authorized administrator of the GitHub repository <https://github.com/rubiidev18alt/angrybirds1dot0pc>.

2. I have obtained, or will obtain before any public release, written authorization from Rovio Entertainment Ltd. or the applicable rights holder that expressly permits:
   - preparation of a PC port of Angry Birds 1.0 for iOS;
   - use of the AngryBirdsPC-1.0.0 Windows build as a technical base;
   - public redistribution of the resulting binaries, assets, and level data on GitHub and GitHub Releases; and
   - use of the Angry Birds trademark solely as necessary to identify the port.

3. The signed authorization is attached as Exhibit A to this attestation and is incorporated by reference. If the authorization is not attached, this attestation is incomplete and must not be treated as proof of rights.

4. I understand that:
   - Angry Birds and its assets remain the property of the rights holder;
   - public availability of files on archive.org, file-sharing sites, or other mirrors does not by itself grant redistribution rights;
   - a self-declared attestation is not a substitute for a signed license from the rights holder; and
   - distributing the game publicly without valid authorization may expose me to legal claims.

5. I agree to:
   - include all copyright, trademark, and attribution notices required by the rights holder;
   - verify the integrity and safety of any executable files before publication;
   - remove or restrict the release if the rights holder revokes permission or requests takedown; and
   - indemnify and hold harmless the rights holder for claims arising from my unauthorized modifications or distributions.

6. I declare under penalty of perjury that the foregoing is true and correct to the best of my

knowledge.

Exhibit A — Signed rights-holder authorization

Attach one of the following:

- the executed docs/PERMISSION_AGREEMENT_DRAFT.md;
- a scanned PDF of the signed agreement; or
- an official email/letter from the rights holder’s legal or licensing department.

File reference: [PATH OR URL TO SIGNED DOCUMENT].

This attestation is provided for convenience only. It is not legal advice and does not grant any rights.
